

Dry Valley Trough System

Product Details

C12 Aluminium valley troughs are an excellent alternative to lead, more cost effective, tougher, and more resistant to accidental damage.

Product Features

- Cost effective alternative to lead
- Lightweight and durable
- Easy to work with
- Will not warp, crack or discolour
- Suitable for slate and tile roofs
- Pre-formed

Dimensions

Code	Size	Colour	PkQty
C12	460mm x 3m/2.4m	Blk•Blue/Blk	5

The components are manufactured from high grade pre-primed polyester coated aluminium.

Product Details

C15 Valley Trim is specifically designed for use in a dry roof valley application, where high volumes of water can travel down the valley. The valley trim permanently secures the cut tiles in the valley, eliminating the problems traditionally encountered with small cut tile pieces falling out. The components are manufactured from high grade pre-primed polyester coated aluminium.

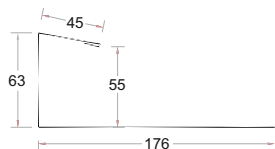

Product Features

- Provides full wind uplift and rain protection
- Extremely easy and quick to install
- Requires no maintenance once installed
- Can be fully customised
- Extensive range of colours available
- Removes the need to point the tiles with mortar
